

Laser in the Daily Practice, A Step Forward

Anas Karkout
Damascus University, Syria

It's a great time for dentists to consider an update to their practices! This can be achieved through using new technologies such as Laser. Unlike traditional tools, dental lasers can improve their patients' experiences by eliminating anesthesia, pain, bleeding and fear, as well as accelerating the healing.

In this lecture we will discuss all the laser advantages and disadvantages, and the importance of using laser in Biostimulation, Periodontal pocket disinfection, Root canal disinfection, cavity preparation, Depigmentation, Gingivectomy, Frenectomy, Orthodontics, Fibroma excision, Impacted canine exposure, Coagulation, tooth whitening, pain relief and Periimplantitis.

Biography:

Dr. Anas Karkout has been practicing Dental Laser since 2012. He has published on this subject in the Asia and the Middle East. Dr. Karkout was a guest lecturer in Italy, Lebanon, United Arab Emirates and Syria. He holds a master degree in Dental Laser (Damascus University).
