

2nd International Conference on

EMERGENCY MEDICINE AND CRITICAL CARE

October 02, 2020 | Virtual Conference

The Role and Experience of Sudan in Assisting to Develop and Implement National Drug Policies

Abdeen Omer

Occupational Health Administration, Sudan

The strategy of price liberalisation and privatisation had been implemented in Sudan over the last decade, and has had a positive result on government deficit. The investment law approved recently has good statements and rules on the above strategy in particular to pharmacy regulations. Under the pressure of the new privatisation policy, the government introduced radical changes in the pharmacy regulations. The 2001 Pharmacy and Poisons Act and its provisions established the Federal Pharmacy and Poison Board (FPPB). All the authorities of the implementation of Pharmacy and Poisons Act were given to this board. This article provides an overview of the impact of the pharmaceutical regulations on the quality of medicines on the Sudanese market from the perspective of the pharmacists working with drug importing companies. The information necessary to conduct the evaluation was collected from 30 pharmacists who are the owners or shareholders in medicines' importing companies. The participants were selected randomly. 89% of respondents considered the medicines on the Sudanese market are generally of good quality. The design of the research itself may be considered inadequate with regard to selection process. However, the authors believe it provides enough evidence, and the current pharmaceutical regulations have some loopholes. The Pharmacy, Poisons, Cosmetics and Medical Devices Act-2001 and its regulation should be enforced. The overall set-up including the Act itself needs to be revised. The emerging crisis in pharmacy human resources requires significant additional effort to gather knowledge and dependable data that can inform reasonable, effective, and coordinated responses from government, industry, and professional associations. Furthermore research should be carried out to understand the scope, magnitude directions of the migratory flows, within and outside the country, as well as the characteristics and skills of the emigrated pharmacists.

Biography:

Abdeen Mustafa Omer (BSc, MSc, PhD) is an Associate Researcher at Occupational Health Administration, Ministry of Health and Social Welfare, Khartoum, Sudan. He has been listed in the book WHO'S WHO in the World 2005, 2006, 2007 and 2010. He has published over 300 papers in peer-reviewed journals, 200 review articles, 7 books and 150 chapters in books.
